

OMNIA

ECOLOGICAL SERVICES

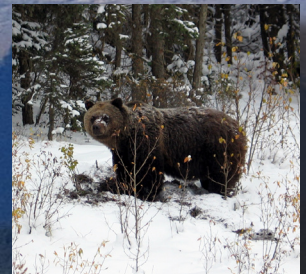

Omnia Ecological is a partnership offering services in three broad areas including:

- Terrestrial Environmental Consulting
- Wildlife Telemetry Equipment Sales and Support
- Applied Research

The partnership is composed of three primary individuals including Michael Charlebois, Greg Sanders and Hans Skatter but also utilizes the support of a team of dedicated sub-contractors and associates, some of which worked together under the banner of HAB-TECH Environmental Ltd.

Omnia partners have collaborated on over 100+ projects and together have extensive experience as environmental practitioners supporting urban land development, the mining (e.g. coal, metals and uranium) and oil and gas industries as well as infrastructure (e.g. roads/water pipelines) and governments.

Based in Calgary, Omnia's partners have been involved in numerous consulting and applied research projects across Alberta, Saskatchewan, British Columbia and Manitoba. Omnia also provides sales and support of wildlife telemetry equipment manufactured by Followit Lindesberg AB in Sweden, one of the leading companies in the world in professional engineering of wildlife telemetry products. Omnia has clients across Canada and the United States.
